Kolkata, West Bengal, India

## Summary

Hi there! I'm a proactive student at IIT Madras with a deep passion for Web Development. I'm fascinated by how the web continuously evolves and the boundless possibilities it offers. I'm committed to mastering the intricacies of this field, always eager to explore new technologies and methodologies to stay at the forefront of innovation.

One thing that sets me apart is my enthusiasm for remote work. I thrive in collaborative environments and appreciate the flexibility and creativity remote work offers. I'm open to diverse opportunities that challenge my skills, whether it's front-end, back-end, or full-stack development. My adaptability and eagerness to learn make me a valuable asset in any setting, and I'm always excited to take on new challenges.

I see every problem as an opportunity to learn and grow. My journey in Web Development isn't just about acquiring knowledge; it's about applying that knowledge to create meaningful solutions. I'm not just looking for a job; I'm looking for a platform where I can contribute my skills, learn from experiences, and make a real impact.

Beyond Web Development, I have a growing interest in Machine Learning. While web development is my main focus, I'm dedicated to mastering machine learning to add another layer of expertise to my skill set. This combination allows me to innovate and create intelligent web applications that leverage data-driven insights.

If you're looking for someone who is passionate, adaptable, and eager to make a difference in the world of Web Development (with a touch of Machine Learning), I'd love to connect. Let's collaborate and embark on this journey of innovation and discovery together!

Looking forward to connecting!

Feel free to adjust it as needed!
